

Professor Carlo Vezzoli, Politecnico di Milano University, Italy

Since 1995 Carlo Vezzoli has been working at the Politecnico di Milano University with research and educational activities focused on design for sustainability. He is professor of Product Design for environmental sustainability and System Design for Sustainability within the School of Design. He is the head of the research unit Design and system Innovation for Sustainability (DIS) and scientific supervisor of the laboratory Design and sustainability (De.SoS) within the INDACO (industrial design) department. Among others projects he is the coordinator of the international universities network LeNS, the Learning Network on Sustainability (funded by EU-Asia Link program, European Commission), for the development and the diffusion of the system design for sustainability discipline in world-wide universities of design (www.lens.polimi.it). He wrote several books, among which Design for Environmental Sustainability (Springer) published in English, Italian, Chinese and Portuguese.
