

Simon Daniel, CEO and founder, Moixa Design and Moixa Energy, UK

Simon Daniel, is CEO and founder of Moixa Design & Moixa Energy (www.moixa.com), a sustainable design and engineering company which pioneers advanced interfaces, portable devices and sustainable energy solutions. Moixa patents and inventions include the PDA Folding keyboard used on over 2m devices, USBCELL batteries (which won the iF Gold Design award last year as a top 50 global design), roll-able screens, wrist based smartphones, 3D Multi-touch IO devices. Moixa believes the future of mobile converges to preferred input/output interface and power solutions. Moixa Energy is developing renewable energy technologies to rethink the future of electricity, and enable homes to rapidly save energy and carbon, using a design led approach. Simon is a former Accenture Senior Manager and holds an MA in Natural Sciences from Cambridge University.
