

Dr Severin Beucker, Senior Consultant, Borderstep, Germany

Dr. Severin Beucker is co-founder and senior researcher of the Borderstep Institute. The emphasis of his research lies upon the analysis of innovation and cooperation networks in the field of sustainable technologies and green future markets. In addition he has a strong focus on technology management, especially the assessment of resource productivity and the cost-effectiveness of new technologies.

Severin Beucker studied environmental engineering at the Technical University of Berlin. He worked for the Institute for Human Factors and Technology Management (IAT) of the University of Stuttgart and subsequently for its cooperation partner, the Fraunhofer Institute for Industrial Engineering (IAO). He managed various joint research projects and projects funded by the industry and conducted taskforces for the development of the emerging research fields of nanotechnology and biotechnology for the Fraunhofer Society and the German Ministry for Education and Research. He completed his doctoral thesis in 2005 at the Faculty for Mechanical Engineering of the University of Stuttgart. Since 2007, he has been a lecturer for the Deutsche Gesellschaft für Qualität and the Carl von Ossietzky the University of Oldenburg, where he is presently teaching cooperation and network management.
