

**Nicholas Morley, Director, Oakdene Hollins, UK**

Nicholas Morley is a founder of Oakdene Hollins and is its Director of Sustainable Innovation. His main consulting and research interests are in raw material risk, sustainable textiles and remanufacturing and reuse. He has been involved in several European and UK studies on raw material supply chain risks and their management. Oakdene Hollins also runs the Centre for Remanufacturing and Reuse, a focus for European research in this area, which carries out certification, environmental impact research and strategic industry studies.

Mr Morley has seven years experience as a director of a tungsten powder metallurgical business, formerly working in the waste management, speciality chemical and polymer industries. He has an MBA from Manchester Business School, an MPhil in polymer chemistry from the University of Bradford and an MA in chemistry from the University of Cambridge.
