

Dr Fabiana Scapolo, Team Leader, Foresight and Horizon Scanning, European Commission Joint Research Centre (JRC), Belgium

Fabiana Scapolo has been working at the European Commission Directorate General Joint Research Centre (JRC) since 1999. She is located at the JRC Headquarters in Brussels where she is part of the Science Advice to Policy Unit. She is team-leader on Foresight and Horizon scanning activities of the JRC, her main task is to set up of a JRC corporate intelligence function on Foresight and Horizon scanning. Currently, she is leading a Foresight study on the future of standards and standardisation as a tool to facilitate innovation and competitiveness. She is also involved in Foresight studies on healthy food and diet; food security and the future of eco-industries.

From May 2008 since September 2011, she worked in the Work Programme and Strategy Unit of the Joint Research Centre where she was in the development of the new JRC Strategy for the period 2010-2020, and on the development and monitoring of JRC's work programmes. Previously she was working at JRC-Institute for Prospective and Technological Studies in Seville (Spain) where she was responsible of the Foresight activities. She has been working on several projects aiming at reinforcing the position of the JRC-IPTS as a centre for Foresight at European and international level. She is interested in the advancement of the application of Foresight as an instrument for policy-making formulation.
