

Sustainable Innovation 2014

Cities & Regions as Catalysts for Smart & Sustainable Innovation

19th International Conference
3rd - 4th November 2014
KADK, Copenhagen, Denmark

Welcome

Welcome to the 19th International **Sustainable Innovation 2014 Conference** focused on 'Cities & Regions as Catalysts for Smart & Sustainable Innovation' organised by The Centre for Sustainable Design® at the University for the Creative Arts (UCA) in the UK.

Sustainable Innovation 2014 will take place on the 3rd and 4th November 2014 at KADK, Copenhagen, Denmark.

This fact file contains information to assist delegates in organising their participation at this high level event.

- **Contact Details**

We hope you find the following information useful and look forward to meeting you at KADK, Copenhagen, Denmark

Background

The Green Economy is now a core part of the global environmental policy agenda with the role of innovation becoming increasingly important. Cities play a key role in the Green Economy but are often 'hot beds' of environmental & social problems as a result of dense populations. However, cities are well placed to act as catalysts for the development of new sustainable solutions to transport, water, food, energy, waste & lifestyle problems due to their public purchasing power & the existence & proximity of key role players in the innovation system. Model implementation of innovative solutions are starting to surface in a number of leading smart, sustainable cities e.g. Stockholm, New York, San Francisco & Copenhagen with significant investment from industry leaders e.g. IBM, Cisco, ABB & Siemens. In addition, a number of city & regional labs, incubators & clusters aimed at stimulating eco-entrepreneurship & innovation have been set up. To accelerate these activities it will be necessary to design systems, structures & networks to enable good ideas to move more swiftly from the lab to realisation & adoption in the market. In a number of cities there is a growing trend towards *grassroots innovation* that includes increasing experimentation with open innovation & crowdsourcing (ideas & funding). Key to this is the sharing of ideas, knowledge & intellectual property often through social networking & ICT platforms. *Grassroots innovation* is also emerging in cities from the Maker & Fixer movements. Makers are engaged in the technological extension of DIY & include individuals from engineering, arts & crafts who are coming together in Makerspaces or more informal Hackspaces. 3D printing is becoming a central technology amongst Makers with the environmental implications starting to be better understood. The *Fixer Economy* has existed for centuries but recently new business models are

3rd - 4th November 2014
KADK, Copenhagen, Denmark

being set up e.g. ifixit.com from the US are providing repair kits & manuals, spare parts & educational online videos for consumer electronic products. In addition, business opportunities for 'product life extension' are being highlighted ranging from strategic remanufacturing models based on service contracts to material innovations that enable re-use. However, the *Fixer Community* that repairs & hacks discarded products & clothing, often operates more socially through, for example, Repair Cafés.

Concept

Sustainable Innovation 2014 will include presentations related to sustainability, products, services and technologies, and includes invited and refereed papers from academics, consultants, entrepreneurs, investors, technology providers, designers, innovation, sustainability managers as well as other business functions. The event will create a unique space for learning, networking and thinking. Delegates will come globally from large companies, SMEs, as well as academia, government and non-governmental organisations (NGOs). The conference is supported by an international Advisory Board.

Conference Topics

Sustainable Innovation 2014 will provide a platform to discuss the opportunities & challenges related to the role of cities & regions in catalysing, facilitating & stimulating sustainable innovation, products, services, technologies & new business models. The event will create a unique space for learning, networking & thinking.

- Radical innovation
- Disruptive innovation
- Market transformation
- Consumption & production
- Green growth & economy
- Circular economy
- Product policy
- (New) business models
- Open innovation
- Makers & 3D printing
- Re-use & remanufacturing
- Fixers & repair
- Crowdsourcing
- Product-service-systems (PSS)
- New technologies & materials
- Innovation processes
- Design strategies
- Organisational dimensions
- Tools & methodologies
- Biomimicry
- User centred design
- Case studies

Why Attend?

Sustainable Innovation 2014 will provide a range of benefits to speakers and delegates:

- Unique: Forum for new thinking, ideas and concepts
- Leading-edge: Presentations from key international researchers, practitioners and policy-makers
- Content: New research, results and thinking
- Networking: Opportunities to meet business, government and academia
- Track-record: Over 2200 delegates from over 50 countries have attended previous events

Benefits of Attending

Sustainable Innovation 2014 will provide a range of new contacts, knowledge, information and ideas.

- New Contacts: 80%
- New Knowledge: 64%
- New Information: 64%
- New Ideas: 58%

Source: 107 respondents from survey of delegates to Sustainable Innovation conferences 2008 - 2012

Sustainable Innovation 2014

Cities & Regions as Catalysts for Smart & Sustainable Innovation

19th International Conference
3rd - 4th November 2014
KADK, Copenhagen, Denmark

Conference Organisers

The Centre for Sustainable Design® (CfSD) www.cfsd.org.uk was established in 1995 at the University for the Creative Arts (UCA) www.ucreative.ac.uk in Farnham, Surrey, UK. CfSD has built world class knowledge and expertise of sustainable innovation and product sustainability. The Centre is recognised worldwide for its knowledge and expertise, having worked closely with business, policy making and research communities for two decades. The Centre researches, develops and disseminates understanding of present and future sustainability impacts and solutions related to innovation, products, technologies, services and systems through projects, training, events, networks and information. The Centre has led and participated in a range of high quality research and knowledge transfer projects worldwide and has organised hundreds conferences, workshops and training courses. CfSD works with partners in Europe, North America and Asia to deliver high quality results and is an internationally recognised centre of excellence.

The Royal Danish Academy of Fine Arts was founded in 1754 and was originally named 'The Royal Danish Painting, Sculpture and Building Academy of Copenhagen'. It was offered as a gift to King Frederik V on the occasion of his 31st birthday. In 1924 the full gender equality principles were implemented, a ground-breaking event marked by the closing of the model school for women. Men and women were now equally entitled to apply for admission to the Academy of Fine Arts. In 2011, the Royal Danish Academy of Fine Arts, Schools of Architecture, Design and Conservation (KADK) was founded as a merger between the Danish Design School and the academy's schools of architecture and conservation.

Travel Tips

Currency in Copenhagen is Danish Krona (DKK).

City Pass tickets for travel in Copenhagen is available at <http://www.visitcopenhagen.com/copenhagen/iframe-movia>

Some Danish words which you might find useful.

Good Morning = Godmorgen

Good Evening = god aften

Thank You = Tak

How much? = Hvor meget

Please = venligst

What time? = Hvad tid?

Bus = bus

Taxi = taxa

Waterbus = vandbus

Train = tog

Travelling to KADK

KADK is located in the centre of Copenhagen, and you can get to KADK by train, bus, waterbus and taxi.

By Train

There are Metro trains every 5 minutes from the Copenhagen Airport Metro station to Christianshavn station. On arrival at the station you should take bus no 9A towards the Opera ("Operaen"), it leaves approximately every 10 minutes and stops at KADK. Ask the driver to tell you when to get off. The price of a ticket for this journey is around (airport to KADK) DKK 36 (€4.85)

By Bus

If you come from Copenhagen Central Station you can take bus no 9A towards the Opera ("Operaen") all the way to KADK. The price for this journey is approximately DKK20 (€2.68)

By Taxi

A taxi ride from Copenhagen Airport to KADK costs around DKK200 (€26.80) and takes from 25 minutes upwards depending on traffic.

By Water Bus

Take the Water Bus No 991 from Nyhavn (big red circle) and get off at the Holmen Nord (big red circle) indicated on the venue map. The cost is DKK24 (€3.25) each way. You can walk from there to KADK (Entrance K) which takes approximately 5 to 10 minutes. Water buses leave every 20 minutes.

The website for the water bus to check on the updated timetable for November 2014 (this might differ from the timetable below).

Sustainable Innovation 2014

Cities & Regions as Catalysts for Smart & Sustainable Innovation

19th International Conference
3rd - 4th November 2014
KADK, Copenhagen, Denmark

About Copenhagen

Once upon a time it was a haven, and preferred watering hole, for the sailors of the Seven Seas seeking a drink, a new tattoo and a good time with the damsels of easy virtue. The beer was flowing and the sailors wouldn't shy away from a good fight and eventually kiss the cobblestones. Today it's one of Copenhagen's major tourist attractions, and the place is packed on a sunny day. You can enjoy dinner or a drink on the pavement under the parasols, and the restaurants and bars provide blankets if it's a bit too chilly for your taste. Nyhavn was dug out in 1671 by Swedish prisoners-of-war under the reign of King Christian V who wanted a harbour in connection with the newly established Kongens Nytorv, so that the city could flourish with this new gateway to the world. The rich merchants of the time built the pretty houses at the harbour, and the famous author Hans Christian Andersen lived in no. 67 Nyhavn for many years.

If you take a canal tour or the water bus you'll notice the Opera, which is a prominent example of modern Danish architecture and is visible from everywhere in the inner harbour area. The building is a private donation from the A.P. Møller and Chastine McKinney Møller Foundation, and it was designed by architect Henning Larsen. On the opposite side of the harbour you'll see The Royal Danish Playhouse, built of handmade stones. The Royal Danish Theatre offers guided backstage tours of both the Playhouse and the Opera, so you can get a closer look at the interior.

Between the Knippelsbro and Langebro bridges is the Black Diamond which houses the Royal Library and the National Museum of Photography. A little further away you'll find Havneholmen with the Aller Media building, and the Gemini Residence on the other side of the harbour at Islands Brygge. Another example of modern architecture in Copenhagen is the work of the renowned French architect Jean Nouvel: Koncerthuset – the Concert Centre at DR Byen, home of the Danish Broadcasting Company. These are just a few of the many modern buildings and if you want to explore the area, the Danish Architecture Centre offers guided tours on foot, on water or by bicycle.

In 2013 almost a third of the Danish electricity consumption was covered by wind (33.2%), which is the highest level in the world. Every year, the European Commission present the European Green Capital Award to a city which has worked sustainably and ambitiously at becoming greener. Copenhagen is European Green Capital in 2014. Copenhagen is world famous for its biking culture and now officially the first Bike City in the World. It really is biking heaven for the cyclist in Copenhagen with over 390 kilometres of designated bike lanes.

In Copenhagen – the capital city of Denmark – one of the trendiest spots is the public outdoor swimming facility in the Islands Brygge area where Copenhageners come to relax during the summer. As a result of a long-term effort of Copenhagen municipality, you can swim in the water in the centre of Copenhagen.

Restaurants

When it comes to eating and drinking there are various options in Copenhagen. Danish cuisine has never been better or more creative – today, we can boast no less than ten restaurants with the coveted Michelin stars – and that's more than any of our Scandinavian neighbours! Danish food is based on fresh produce from the countryside and the sea. Watch out for exciting fusion cuisine, mixing traditional Danish fare with influences from France, Asia or the Middle East. Then round off a perfect evening with a glass of our famous Aquavit. Skål!

Pubs

Denmark has been through a beer revolution. The country used to be dominated by the Carlsberg/Tuborg alliance, with only a few regional strongholds maintaining local identity with brew. Ten years ago there were 18 breweries in Denmark. Now there are around 180: a 1,000% increase in ten years. Almost all of the new brewers are small artisanal brewers, looking for better, deeper flavour and lasting impressions.
