

Sustainable Innovation 2019

Road to 2030: Sustainability, Business Models, Innovation and Design

22nd International Conference

4th – 5th March 2019

UCA Business School

Epsom, Surrey, UK

**Dr Laurent Bontoux, Senior Foresight Specialist, EU Policy Lab, Joint Research Centre (DG JRC) ,
European Commission, Belgium**

Dr. Laurent Bontoux is a Senior Foresight Specialist at the EU Policy Lab of the European Commission's Joint Research Centre (DG JRC). He holds a food technology engineering degree from ENSIA (Paris, FR) and a DEA from the Technological University in Compiègne (FR) as well as a MS and PhD in environmental engineering from the University of California at Berkeley (USA). Laurent started his professional career ensuring the environmental safety of household products at Procter & Gamble in Brussels.

After joining the European Commission, he was mostly dealing with science to inform policy making, especially regarding risk assessment. At DG JRC he worked on issues such as environmental technologies foresight, environment & health issues (e.g. wastewater reuse, endocrine disruptors) and life-cycle assessment. At the Directorate General for Health and Consumers (DG SANCO) he managed the independent Scientific Committee for Emerging and Newly Identified Health Risks (SCENIHR) and dealt with nanotechnologies, antimicrobial resistance and the health effects of electromagnetic fields. He also worked at the Directorate General for Research (DG RTD) in the Food and Environment & Health areas. Laurent is now heavily involved in bringing future oriented systemic thinking into EU policy making in a pragmatic way, with a focus on sustainability issues (sustainable transitions, SDGs...).
